

**VA - INJECTOR MIXER HPI**

*For sludge conditioning*

# **VA - INJECTOR MIXER HPI**

**RETROFITTABLE!  
REDUCES POLYMER DEMAND!**

A novel invention from W+AT: The retrofittable VA - Injector Mixer HPI significantly contributes to an efficient and economical sludge conditioning by means of a flocculant. HPI improves the sludge's pressure stability and lowers polymer demand and dry content in the dewatered sludge. The installation of a HPI furthermore increases the throughput performance of your dewatering system. The device is already in successful use in over 100 communal and industrial appliances all around the world and will meet your high expectations!

**Available in sizes from  
DN 65 to DN 100**
